

Built to Last!

Recommended worldwide by leading eyecare specialists, the COIL Hi-Power Magnifiers have established a reputation for functionality, durability and outstanding value.

At the heart of each magnifier is an aspheric lens designed to give a sharp, distortion-free image. The acrylic lens material offers excellent clarity and strength. The frames are designed for aesthetic appeal and comfortable grip in either right or left hand.

More than just a fixed stand magnifier!

COIL stand magnifiers are available with eight different power variations (8D to 76D) and the lens is held at precisely the right working distance to give a clear and steady image.

Our designers wanted to create more than a simple fixed stand magnifier so they added a tilt feature to the low power versions and a focus adjustment to the high power versions, so that they can be used with ordinary reading glasses.

Features like these ensure that COIL magnifiers will stand the test of time.

- Aspheric Lens
- Ergonomic design
- Comfortable grip
- Range of powers
- Strong durable frame
