USB 2.0 Hi-Speed connection, 1 GB internal memory, SD card connection up to 32 GB, headphone connection, integrated RFID reader (Speakout), integrated clock, FM tuner.

Main Applications

Milestone 312 is offered in the following basic version and can be upgraded according to your wishes with the listed „Extras":

Basic	**Audio**	**Music Player:** This player is designed for an optimal music enjoyment. Besides high quality play back you do not have to worry about music formats, Milestone 312 takes care of it. May it be MP3, AAC, WMA or even further formats. **Voice Recorder:** Professional and clear voice records are Milestone's specialty. Even in noisy environments such as trains or airplanes the records sound blameless. Over the clear and powerful built-in speaker you receive a one-of-a-kind play back. **Text To Speech:** This application enables you the reading of text files, even in different languages. Audio allows you to play all files at different speed levels. File storage and management is possible in a freely accessible folder structure.
	Books	Books integrates a DAISY player for talking books. In addition Books will be compatible to new Audible.com High Quality AAC format soon. Reading speed is selectable.
	Alarm	Alarm is an easy-to-handle alarm and sleep timer, which works together with the integrated clock.
Extras	**Speakout**	The built-in RFID reader allows you to read RFID tags. Label objects (CDs, medicaments, clothes) with a variety of tags. For every tagged object you can record a voice message and next time you scan the object, Speakout will play this message and you identify the object easily.
	Radio	The complete FM tuner integrates automated channel searching, channel saving, direct frequency input and radio recording.
	Add-On	In future, attachable Add-Ons, specialized for Milestone 312, are going to enable totally new applications. As an example Bones Inc. is currently developing a color detector.

Milestone 312 contains a menu-mode available at any time. Therein you find besides an information service with announcements as time, date, battery status etc., a multitude of settings and functions, which will enthuse professional users. But also beginners will enjoy because of the easy handling.
